TERMS OF SALE

Important-Read Carefully Before Ordering

Quotations: The prices quoted herein are payable in U.S. currency and are as low as can be made for strictly first class merchandise. Three per cent sales tax must be added to the cost of all orders for delivery in the state of California. This list cancels all previous quotations.

MINIMUM ORDER \$3.00. NO C.O.D.'S PLEASE.

Collections on pages 1, 17 and 32 are the only postpaid collections in our catalog.

FILLING ORDERS: Orders are filled in strict rotation, carefully labeled, lightly and securely packed and delivered to the carrier in good condition. In case our stock of numerous listed varieties is exhausted, we reserve the right to cancel the order. To avoid the need of such action, order early. Assist in prompt delivery by NAMING A SECOND CHOICE WHEN SUBSTITUTION IS PERMISSABLE.

TIME OF SHIPMENT: Plants are normally shipped through April, May and June. When available, plants are shipped earlier to Central South States.

Any replacement request must be made within ten days after plants are received. Please send postage for replacements. Refunds are made after July 1st.

No Guarantee: While we exercise utmost care to keep our stock true to name, we give no warranty, expressed or implied, and cannot guarantee or be in any way responsible for the crop, either as to variety or product. All orders are accepted on the above terms.

Claims for Damage: All claims for damage must be entered against the carrier by the buyer. Inasmuch as we have no control over the transportation agencies, we cannot be responsible for plants damaged in transit by respective extremes in temperature, rough handling or injury due to delayed delivery.

READ VERY CAREFULLY

SHIPMENTS: If plants are to be shipped by parcel post, please add cost of postage as per schedule below. All prices quoted are F.O.B. San Dimas, California. To insure better delivery we suggest Air Parcel Post in Zones 6, 7, and 8.

SPECIAL DELIVERY WILL EXPEDITE THEIR MOVEMENT. For this service 35 cents up to 2 pounds, 45 cents up to 10 pounds, and 60 cents above 10 pounds must be added to the basic rate.

FLOWER SHOW BLOOMS with BLANCHARD PLANTS

EMERALD ISLE—(Our 1949 introduction). When this flower opens the general effect is light green. Dainty thread-like tubes undergo rapid changes in color as it matures. A uranium green shading out to a creamy white creates a beautiful symphony in color. Med. hgt. Mat. Nov. 1.

\$1.00 each

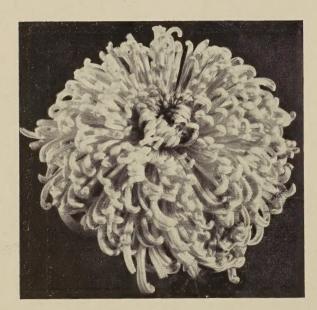

FRANCES KNIRSCH—(Our 1951 introduction). A medium size, fine tubed buff colored spider with very full petals extending slightly upward. The tips are the conventional fishhook type, the open ends of which are bright red in color. Med. hgt. Mat. Oct. 20.

LADY BIRD—Medium orchid pink throughout. Probably this is the most slender threadlike spidery variety we have ever seen. Med. hgt. Mat. Oct. 5.

35c each; 3 for \$1.00

MARIE TASHIMA—White. Large tube. Fish-hook tips. Diameter 12 inches. Mat. Oct. 5.

35 cents each; 3 for \$1.00

KATHERINE LOUISE—Delicate orchid. Large tubular petals terminate in open tips which hook slightly upward and show a darker shade of orchid within. Med. hgt. Mat. Nov. 15 on. 35 cents each; 3 for \$1.00

GOLDEN WONDER—(Our 1944 introduction). A flower that is aptly named, for verily it is a golden wonder. It has the conventional slender, tubular petals with slightly upturned fishhook tips billowing downward from an unusually deep full center. Med. hgt. Mat. Nov. 10.

35 cents each; 3 for \$1.00

MAUVE—A wine red spider with slender, tubular petals cascading downward from a very full center. As a departure from the conventional fishhook type this bloom has a combination of closed tubes, plain hook tips; fishhook tips and spoon tips. A charming bloom. Tall. Mat. Nov. 1.

35 cents each; 3 for \$1.00

MELODY—Clear, deep yellow with large tubular petals radiating horizontally from a full center. Open hooked tips curve gracefully upward. Med. hgt. Mat. Oct. 10. 35 cents each; 3 for \$1.00

KAY TASHIMA—Giant size white. Large tube. Fishhook tipped. Mat. Oct. 1.

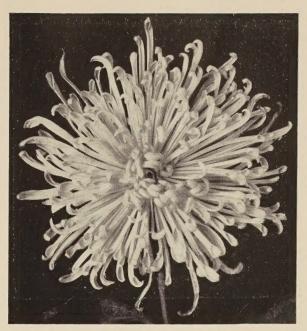

LORRAINE — Large lemon yellow spider of quality. Excellent quilled petals terminate in open spoon tips curling inward. Tall. Mat. Oct. 20. 35 cents each; 3 for \$1.00

MITSUKO—A fascinating French gray spider with fullness of center and symmetry of form. Has long slender tubes and bright lavender terminal ringlets innerlined with brilliant red. Med. hgt. Mat. Nov. 10. 35 cents each; 3 for \$1.00

MORGAN'S WHITE—A pure white spider of excellent quality. Fishhook tips terminate the long quilled petals which billow downward gracefully. Med. hgt. Mat. Oct. 15.

35 cents each; 3 for \$1.00

MAMORU—A bright orange bloom shading inward to a rich orange-bronze center. Has excellent keeping qualities, an abundance of lively green foliage and tall stiff stems. Ideal as a cut flower. Mat. Oct. 20. 35 cents each; 3 for \$1.00

NIGHTINGALE—A spidery type bloom of most unusual coloring. Difficult to describe, the term "Chartruese green" covers the description fairly well. Will fade under strong sunlight, therefore we recommend shade as soon as the buds begin to open. Med. hgt. Mat. Oct. 25. \$1.00 each

PAUL MILLER—(Our 1942 introduction). An unusually large medium tubed buff colored spider with very full red center shading to a coppery bronze. Tips are of conventional fishhook type, open ends of which are bright red in color. Tall. Mat. Oct. 15.

GEORGINA HEDINGER—(Our 1946 introduction). This gorgeous fluorescent plume may aptly be termed a symphony in pink. Start with the brightly colored crowning mass of short, curly petals and follow downward along the smooth expanse of slender, graceful tubes to their termination and you will have run the full scale of pinks in all their variations. Has large, open fishhook tips innerlined with crimson amaranth. Med. hgt. Mat. Nov. 1.

50 cents each; 3 for \$1.35

PATRICIA GRACE — Long, cord-like petals. Delicate rose-pink of exquisite shade. When disbudded attains a size of 12 inches. Med. hgt. Mat. Oct. 15.

35 cents; 3 for \$1.00

PUNCH BOWL—A rich burgundy red spider with medium tubes gently falling away from a deep full center. Tips are open, hooked and tightly curled upward. The answer to a true chrysanthemum lover's dream of perfection. Med. hgt. Mat. Nov. 1. **35 cents each, 3 for \$1.00**

ITO PINK—One of the very best spider types for cut flowers. Full center with long quilled petals cascading downward. A medium pink throughout. Med. hgt. Mat. Nov. 1. 50 cents each

PEACE—(Our 1951 introduction). Medium tube petals of deep yellow with a barbed open spoon showing a carmine red within. Tall. Mat. Nov. 5.

50 cents each

PEGGY ANN HOOVER—Light delicate pink with straight medium tubes. An old number, but still a great favorite. Med. hgt. Mat. Oct. 25.

35 cents each; 3 for \$1.00

SUSAN LEIGHTON—A beautiful white spider. Tubular petals widening near the ends, showing to great advantage the barbs of an attenuated fishhook tip. Med. hgt. Mat. Oct. 25.

MARIA—A rich creamy flower with a pronounced greenish overcast. Has large tubular petals terminated by slightly barbed, reflex tips. In full bloom an open center displays a contrasting bright yellow disc. Med. hgt. Mat. Oct. 15. 35 cents each; 3 for \$1.00

PURE GOLD—(Our 1951 introduction). This fine tube spider, with its lovely old gold color in the center, shades off to chrome yellow at the ends of the petals. The tiny open spoon tips show a bit of red which greatly adds to its beauty. Med. hgt. Mat. Oct. 15.

50 cents each; 3 for \$1.35

ROYAL APRICOT — (Our 1951 introduction). The petals are apricot bronze in color. Some are quilled and feathery in type, some are spoontipped and others are tubulated. The large open spoon shows a deep rose red of great brilliance. Tall. Mat. Oct. 20. 50 cents each; 3 for \$1.35

FEATHER-SPIDER Collection

SARAH MORASCH—The color of this charming spider is a peony purple with carmine shading. An airy graceful flower with long slender petals ending in an orchid fishhook. It carries characteristics of one of its parents—Punch Bowl. Med. hgt. Mat. Oct. 25.

35 cents each; 3 for \$1.00

WHITE SUPREME—A full petaled large clear white spider with graceful long tubes. Med. hgt. Mat. Oct. 25. 50 cents each; 3 for \$1.35

MISS GENA HARWOOD—Rosy mauve. Sport from Rayonnante. Tall. Mat. Oct. 15.

WAIKIKI—A very large and full bronze spidery incurve with fishhook tips of a rich golden color. An outstanding specimen of this type of chrysanthemum. Has a rigid stem and good foliage. Tall. Mat. Nov. 1.

50 cents each: 3 for \$1.35

ALGIERS—A new bright apricot bronze pompon. Excellent compact sprays generously produce perfectly formed two inch flowers. Med. hgt. Mat. Oct. 25.

BARCAROLE—An easily grown golden yellow pom, extremely formal in appearance. High production rate and lack of sensitivity to cultural conditions are valuable assets. Tall. Mat. Nov. 5. (See color illus. page 29.)

CALIFORNIA FIREBIRD—Bronze with glints of gold. Exotic in formation and very graceful. Tall. Mat. Dec. 1.

BONTON—A small intermediate of the button formation. From a distance it appears to be a solid golden bronze in color, but upon closer inspection it shows a mass of tightly cupped petals, the exterior surface of which show a bright red. A most beautiful contrast. Tall. Mat. Oct. 15.

BRONZE DOT—A delightful sport from "Pink Dot" with most satisfactory growing habits. Med. hgt. Mat. Oct. 25.

CHRISTMAS CHEER—We recommend this variety to those desiring flowers for Xmas. The color is a rich deep yellow which does not lose brilliance under artificial light. Three-foot plants carry a profusion of two-inch flowers. Mat. Dec. 15 on.

CHRISTMAS RED—Deep red decorative. Med. hgt. Mat. Dec. 10.

DAINTY MAID—A compact, soft blush pink baby button of exquisite daintiness. The type of flower that mellows with age. Med. hgt. Mat. mid-Oct. on.

EARLI WHITE—A good pure white pompon of exquisite beauty. One of the best early whites. Tall. Mat. Oct. 1.

EDITH ROBERTS—Splendid firm large button type pompon. A very deep orchid pink, similar to Minuet which is shown in color on page 29. (Minuet we have dropped.) Med. hgt. Mat. Sept. 25.

GOLD COAST—Fine sprays of a brilliant yellow. Heavy bloomer. Med. hgt. Mat. Oct. 25.

JOAN WELLS—Good bronze. The center is a much darker shade, which adds greatly to the attractiveness of the bloom. Tall. Mat. Oct. 15.

GRENADIER—Rich, mahogany red decorative pom of great merit. Tall. Mat. Oct. 15.

EVERYBODY'S FAVORITE

You'll love Pompons because they are so colorful and can be used in so many flower arrangements for indoor decoration. Plant at least six.

Top—Edith Roberts Center—Silver Ball Lower Right—Barcarole

MARY McARTHUR—A large compact button. At first glance it appears to be a solid deep raspberry rose, but with closer attention it shows a mass of tightly cupped petals washed with gold at the tips, a lovely contrast. Med. hgt. Mat. Sept. 25.

MISSION—A delicate pink with a dark maroon center. This is one of the most outstanding intermediate pink blooms. Med. hgt. Mat. Nov. 10.

PINK DOT—This lovely bloom of soft delicate pink with its darker center, is an old introduction, but still retains its popularity among mum lovers. Med. hgt. Mat. Oct. 25.

REVELATION—The blooming period and undespoiled whiteness of this flowery, decorative gem bring to mind with vivid clearness the Yuletide carol "White Christmas." Tall. Mat. mid-Dec. on.

SAMOVAR—Bronze red decorative. Strong stems and prolific bloomer. Tall. Mat. Nov. 10.

TRIUMPH—Deep wine red which borders upon the purple. An outstanding color and flower. Tall. Mat. Nov. 10.

YELLOW DOT—An unusually good yellow with dark center. Is a good bloomer and makes a good cut flower. Med. hgt. Mat. Oct. 20.

"Blanchards are Best"

SEAFOAM—A medium sized, clear white pompon of virgin purity. The snowy clusters of full, well rounded flowers on tall, trim stems is accentuated by the vivid coloring of the underlying greenery. Med. hgt. Mat. Nov. 20.

General Cultural Suggestions

Following are a few vital facts pertinent to the subject of successful chrysanthemum culture:

SOIL CONDITIONING—The chrysanthemum is a gross feeder. It is, therefore, necessary that the soil in which it is to be planted contains a sufficient amount of plant food to supply, without the aid of too frequent applications of liquid or commercial fertilizer, the demands of a long growing season. If in doubt as to the fertility of your land, we suggest that you work in with it a thoroughly rotted manure, well in advance of planting date and in quantities commensurate with the soil in question. Loose, sandy soil, particularly when of a nature unquestionably deficient in organic matter, should receive a heavier application per unit of space than that required by the same unit of space in a heavier and more productive soil.

The nature and amount of plant food to be used during the growing season can best be judged by the character of your soil and the variety and condition of the plants to be treated. Avoid the hazards of over-fertilization. Discontinue feeding when buds begin to show color.

PLANTING—Early planting is an important factor in the timely formation of a robust root system, a prerequisite to the growth of strong, sturdy plants and quality flowers. When seasonal blooms are desired at an advanced date it is doubly important that planting be done early in order that plants may attain sufficient height to permit the taking of crown buds. (SEE BUD SELECTION.)

WATERING—Variation in the composition of soils and variation in climatic conditions, due to geographical differences, render the matter of watering a problem for local study and solution. However, here are a few salient points ever to be kept in mind if you are to avoid the consequences of a careless, haphazard plan of irrigation.

We cannot emphasize too strongly the necessity of keeping the roots of your plants moist at all times. To subject them to a drought, however slight, will cause a sudden check in growth, a setback that may later be responsible for a host of trouble—the appearance of rust, mildew, blighted or blackened foliage and the premature hardening of wood, premature setting of buds with a sequence of partially developed and misshaped flowers.

Avoid overwatering as it is apt to lead to equally disastrous results. Confine your irrigation activities to a time of day sufficiently early to allow superficial drying of foliage before nightfall.

STOPPING—When the young plant has become firmly established—normally within a period of two weeks from planting date—pinch out the top. This simple operation is known as "stopping" and will bring about the formation of three or more new shoots, the subsequent

handling of which must be governed by whatever plan you may have for their future disposition. In order to dwarf your plants, make them bush out, and to increase their yield of blooms it may be necessary to "stop" them a number of times, the proper number to be determined by the particular variety of plant in need of such attention and the specific result desired.

RESTRICTION OF LATERAL GROWTH—A plant, when allowed to retain no more than one, two or three stems, will develop much larger blooms than it will if permitted to grow without restriction. This is especially true of the large flowering types—exhibitions, commercials, spidery sorts and some of the larger anemones.

When the plant's energy, governed as it is by the amount of needed elements it assimilates from the soil, is used in feeding a profusion of growth, we cannot well hope to obtain maximum results as regards size, color or shape of bloom.

Excellent results may be had by raising four, six or eight disbudded blooms on plants of the larger pompon, anemone and single types suitable for the purpose, the number to be chosen varying with the type and variety of plant.

BUD SELECTION—Early in August many varieties produce a cluster of buds, the central and larger of which is termed the early or crown and the encircling buds vegetative. For exhibition types and many of the large commercials, it is desirable to "take" the crown bud.

While the term "take the bud" may be enshrouded in ambiguity, it simply involves the mechanics of removing the buds not to be used and reserving the one chosen as the best for development. Therefore, if you wish to "take" the crown bud, you remove the encircling buds and reserve the one in the center.

If it is desirable to use what is commonly known as the terminal bud, the foregoing operation is reversed. The central or crown bud and all but one of the encircling or vegetative buds are removed. From the remaining bud will spring a vegetative growth that will in time produce another cluster of buds, the central one of which should be "taken" or reserved and all others removed.

All crown buds, excepting those from plants of an extremely early blooming habit, appearing in the months of May, June and July, should be removed along with all excess lateral growth. It is also necessary to keep all axilary and basal growth broken out. The plant should be given a thorough going over at frequent intervals in order to keep it free from all superfluous growth, thus insuring a minimum waste of plant energy.

SPRAYING—The chrysanthemum is not immune to damage frequently caused by the uncontrolled activities of a variety of common insect pests; neither is it secure against the inroads of malignant fungi that may find in it a beneficent host unless preventive measures are taken. It is therefore wise and prudent to start spraying early.
